Client Information

- Betterflye is a software and service company focused on impact tracking and non profit support.
- People
 - Virginie McNamar
 - Tim Skinner
- <https://www.betterflye.com/>

Mentor Feedback

- Mid-Iteration Feedback
 - Could use less whitespace in UI
 - Make sure screenshots are up-to-date in documentation
 - Look into adding support for multiple languages
 - Look into separating some of the text from the mobile app, this way if Betterflye's wording changes, they won't need an update just for that.
- End of Iteration Feedback
 - Typo in development documentation
 - Mentor is overall happy with documentation and software
- Changes
 - Fix the typo
 - Will look into adding more colors or images to fill whitespace

Client Feedback

- Feedback
 - Pleased with functionality so far, and app is “pretty enough”
 - Could add some of Betterflye’s badges to app’s home page just like the web app
 - Client is overall pleased with progress so far
- Changes
 - Keep mobile app’s design consistent with web app

Iteration 2 Features

- Create an initiative container page (state and view)
- Add a bottom navigation bar on profile page
- Add QR code scanning (state and view)
- Move logout button to drawer
- Create initiative page list (view)
